

ABSTRACT**TURBOFAN ARRANGEMENT**

5 A bypass turbofan engine comprises a first propulsion
system and a second propulsion system. The first
propulsion system comprises a first fan rotor, a core
engine, a first low pressure turbine and a first fan shaft
drivingly connecting the first turbine and the first fan
10 rotor. The second propulsion system comprises a second fan
shaft drivingly connecting to a second fan rotor and the
first propulsion system and arranged so that the first and
second shafts are not coaxial with one another.
